Audio and Video Post-Production

Montreal Campus - International students

Post-production is both the science and the art of bringing a video production — such as a film or television show — to life. In simple terms, post-production refers to all the tasks that occur after filming is complete and the editing of the visual and audio materials begins.

Our Audio and Video Post-Production program will give you the knowledge and skills to thrive in this industry. You will receive specialist, practical training to become proficient in all the major facets of the discipline — video and sound editing, mixing, Foley, automatic dialogue replacement (ADR), motion graphic design, and more! You will work with industry-standard equipment and software programs, thus better preparing you to enter the workforce successfully upon graduation.
